

Kelly Cooper will represent our communities well in Juneau, as she has at Borough Assembly here on the Kenai Peninsula. I have had the pleasure of working with Kelly in a variety of fashions over the last twenty years. Kelly has the passion and drive to improve the health of our communities in every manner possible, from physical and mental health to financial success and preserving our way of life.

I have always been impressed with Kelly's willingness to both educate and be educated. None of us will find a representative with whom we agree on each and every topic. We do need representatives like Kelly who are earnest in their willingness to listen to additional perspectives, process new information and consider it on the merits, while also respectfully communicating if there are elements where they continue to have disagreement.

Please take the opportunity to meet with and/or have a discussion with Kelly---you will quickly learn that she has the best interests of our communities in mind, and she will work passionately to represent us.

Mike Dye
